digestion, and dental well-being.

A unique, high-quality
product that stands
out in grocery and
pet store aisles.

USDA ingredients
and facilities

Free from heat
processing,
preservatives, or
artificial additives.

Why Raw is Better Than Dry Foods

Why Choose Raw Over Dry?

Higher Nutritional Value:

Raw food maintains essential nutrients often lost during the high-heat processing of dry kibble.

Promotes Better Digestive Health:

Raw food is easier to digest and can improve gut health, leading to smaller, healthier stools.

No Artificial Preservatives:

Unlike dry food, Bearski is free from fillers, artificial additives, and chemicals used to extend shelf life.

Improved Dental Health:

Chewing whole chunks of meat helps clean teeth naturally, reducing plaque and the need for dental treatments.

More Natural Energy:

Dogs on a raw diet often show increased vitality and energy, fueled by a biologically appropriate diet.

100% Natural Ingredients

Pure, Raw Nutrition for Optimal Health

Uncompromised, pure, and raw ingredients straight from nature.

Promotes a healthy gut, shiny coat, strong teeth, and optimal energy levels.

Free from artificial additives, fillers, or chemicals.

A premium addition to your grocery or pet store's natural product offerings.
